

ICARD™

*Let's show you
all the ways
you can share
your profile*

About

ICARD™

We are an innovative company that uses the latest technology to connect people and build relationships.

5 WAYS TO SHARE

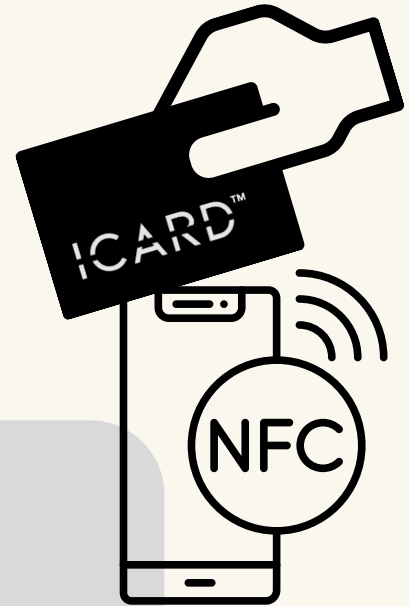

NFC

The "tap" function

ICARD is built on the latest NFC (near field communication) technology. This tech is necessary to use your phone for virtual payments etc. As this tech is only now gaining traction, the latest smartphones have it installed. With Android you can switch it on and off and with Apple (from v10 onwards) it is a standard feature and is always on.

- Simply tap your card against the phone
- If the phone has NFC, it will pick up the signal
- Your ICARD profile will open on the phone

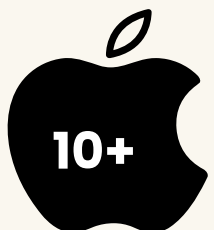

Your prospect can then:

- Import your contact detail and save all your info
- Be directed to your social media accounts
- Complete a contact form to be sent to yourself
- Watch a video of yourself / your services / your products

ON

OFF

ON

If your prospect has an older phone that is not NFC enabled, you can direct them to your ICARD PROFILE in the following ways.

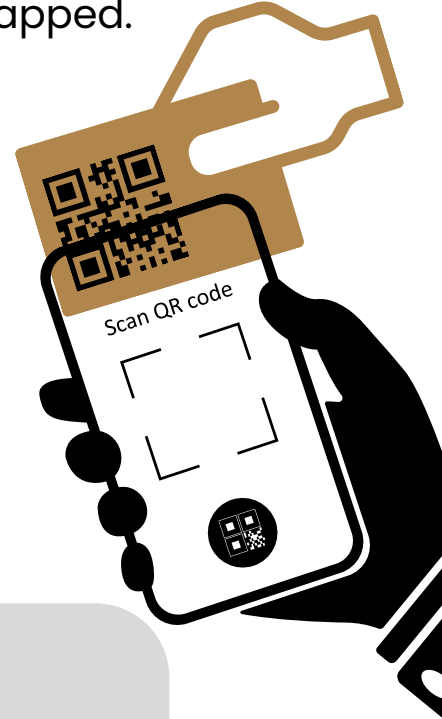

QR CODE

Most phones have a QR Scanner app installed. With Apple you can use the phone's camera - the camera will automatically pick up the QR code and show the link to be tapped.

- Each ICARD is issued with a QR CODE
- Simply scan the QR to be redirected to your ICARD PROFILE

Your prospect can then:

- Import your contact detail and save all your info
- Be directed to your social media accounts
- Complete a contact form to be send to yourself
- Watch a video of yourself / your services / your products

What if your prospect does not have NFC or a QR SCANNER?

Then you can use the following options ...

UNIQUE LINK

Your ICARD PROFILE has a unique link. This link appears next to your QR code on your ICARD.

icard.vip/**unique link**

Share this link in **2** ways

Use your phone

- On your own browser (Chrome/Safari etc), go to your profile and use your browser's share icon  to share the link through many platforms, ie. sms, whatsapp, messenger etc.
- Simply sms, whatsapp etc. your link

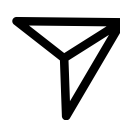

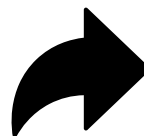

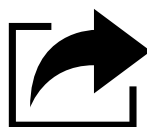

Use their phone

- On your prospects phone, open their browser and type in your UNIQUE LINK.

Your prospect can then:

- Import your contact detail and save all your info
- Be directed to your social media accounts
- Complete a contact form to be send to yourself
- Watch a video of yourself / your services / your products

Different mobile devices use different share icons

PDF CARD

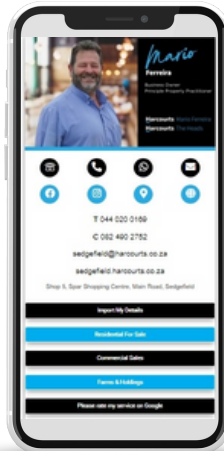

You will also receive a clickable PDF card that you can forward to your prospects. We will send your PDF card via whatsapp.

Forward this card via whatsapp, telegram, email etc.

Your prospect can click on the *"Click to import my detail"* button and be directed to your ONLINE PROFILE

Your prospect can even scan your QR code from this PDF CARD.

Your prospect can then:

- Import your contact detail and save all your info
- Be directed to your social media accounts
- Complete a contact form to be send to yourself
- Watch a video of yourself / your services / your products
